Subject: WELLHEAD WATER SERVICE

The Wellhead Water Service Rate 18501 is available to select customers for commercial and industrial process (non-potable) use. In order to qualify for this rate, customers must have existing infrastructure in place to draw water directly from a wellhead, providing that the customer's premises are adjacent to a City of Hibbing wellhead.

All HPUC water service is rendered under and subject to the General Service Rules and Regulations of the HPUC. Service provided under the Wellhead Water Service Rate 18501 is interruptible, and the HPUC reserves the right to discontinue service at any time for any purpose it deems necessary.
